Imagine being born in a first world country as a second class citizen with third world problems.

PROBLEM NARROWED

How do we overcome the racial technology gap to make it easy for people in impacted communities to access basic human needs from donor allies?

One design rational : application over website. In direct response to the technology inequality we chose to design an application that is beyond simple. Have you ever tried to sign up for blue apron?

One Request : Coordination to conduct 3-5 persona interviews with impacted user groups before the first bi-weekly meetup.

WHO 2 WHO SHOP

USER STORIES

What can *Who 2 Who* do?

User:

As a user I can log into SmileTrust

As a user I can see available items in my geographic area

As a user I can order items to be delivered to my home location

As a user I can request items not available

Donor Ally:

As an donor ally I can log into SmileTrust

As a donor ally I can submit items (groceries, funds) as available to *Who 2 Who* in my geographic area

As a donor ally I can see requests for items in my area

Shop Ally:

As a *Who 2 Who* Shop Ally I can add geographic areas of availability

As a *Who 2 Who* Shop Ally I can add items from a donor to a geographic inventory
